

Lake Assessment – July 2023

Lake 1: Small Lake

At the time of my visit the lake was milky black looking. OK.

Nutrient levels were elevated for nitrogen and phosphorous this month. Unwanted aquatic plant growth was not a problem.

Lake 2: Large Middle Lake

At the time of my visit the lake was milky slightly greenish looking again. – OK.

Nutrient levels were low – good.

Lake 3:

At the time of my visit Lake Superior was milky greenish looking – OK.

Nutrient levels were high for phosphorous and ok for nitrogen.
