

Lake Assessment - January 2023

Lake 1: Small Lake

The lake was slightly brownish green looking. OK. Geese and geese manure were present. Nitrogen levels were low OK. Phosphorous elevated.

Lake 2: Large Middle Lake

At the time of my visit the lake was milky and slightly greenish brown looking. Looked OK. Excessive geese manure along the dam. Nutrient nitrogen and phosphorous were elevated.

Lake 3:

Lake Superior was slightly greenish brown - OK. Geese and geese manure not excessive. Nutrient phosphorous was elevated and nitrogen were low OK.
